Yogyakarta, Special Region of Yogyakarta

Universitas Amikom Yogyakarta 2013-2018

Summary

System Documentation Engineer creates all needed documentation, with specific emphasis on the technical area. Currently, I am working at Telkom Indonesia to maintain all documentation of each software/product life cycle and help codex powered by Telkom Indonesia as Data Engineer to build data pipelines.

Experience

Data Engineer

CODEX powered by Telkom Indonesia, Jakarta

April 2021 - Present

- Translate business propositions into quantitative queries and collect/clean the necessary data.
- Build scalable databases capable of ETL processes using PostgreSQL, MongoDB, Spark, Airflow, API services, and Google Cloud Platform.
- Building Robust systems for ingestion and data processing.
- Managing metadata and other information related to maintained data working with other teams, data analysts, and data scientists.

Software Documentation Engineer

Telkom Indonesia, Jakarta

September 2018 - Present

- Create, update, and maintain all documentation of each software/product life cycle.
- Within a cross-functional team, collaborate with other developers, software architects, quality assurance, UI designers, UX researchers, product owners, and scrum masters.
- Scripting for API Documentation and Mockup.
- Create data models, diagrams, workflow, and so forth to assist the technical team.
- Learn multiple tools for the job.

Skills

- Technical Documentation (*Jira Atlassian, Swagger, Postman, Confluence, Notion*)
- Data Orchestration (*Airflow, Airbyte*)
- Agile Methodologies (*Scrum, Kanban*)
- Programming & Database (*Python, NodeJS, Flutter, PostgreSQL, MongoDB*)
- Cloud Services (*Google Cloud Platform, AWS*)
